### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Jon Christensen on 10/31/2005.

3. The application has been amended as follows:

In the claims:

Claim 24: in lines 18-19, delete "thereby reducing the likelihood of contact with the active device"

Claim 28: in lines 19-20, delete "thereby reducing the likelihood of contact with the active area"

Claim 35: in lines 18-19, delete "thereby reducing the likelihood of contact with the active area"

Art Unit: 2828

Claim 42: in lines 17-18, delete “thereby reducing the likelihood of contact with the active device”

***Allowable Subject Matter***

4. The following is an examiner’s statement of reasons for allowance: Claims 24-42 are allowed because the prior art fail to teach or fairly suggest an apparatus and method for protecting a semiconductor device including a plurality of metallic pads around the periphery of an active device only in said inactive areas on the surface of the wafer, each pad having a greater relative height measured from the surface from the wafer than the height of any portion of a respective active device such that the pick and place tool only make contact with the pads surrounding the active devices of the wafer.

Wu (‘888) discloses a semiconductor device in Fig. 2 with a pad that has a plurality of metallic pads 226 having greater relative height measured from the wafer compared to the active region; however, the pads are also disposed on the active area (210) and attached with the wire 224 which is not for the pick and place to contact with.

Cai (‘779) discloses in Fig. 3 a plurality of bonding pads 302 which also have greater relative height compared to the active area. However, Cai is silent about using the specific pads for preventing pick and place tool to make contact with the active area /device by contacting with the pads.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
